Engineering Intelligence & Mastery Platform (EIMP)

Organise engineering knowledge, assess your understanding and support better-informed technical decisions.

Product overview

Engineering research graph with 300 specialist records across 30 domains, source-linked claims and staged research/promotion controls.

Potential acquirers

- Engineering education vendors
- Research organisations
- Technical knowledge teams

Documented functions

- Organise engineering knowledge domains
- Allocate specialist research scope
- Track evidence and research gaps
- Prepare assessment inputs
- Review knowledge-promotion status

Available output types

Research programmes / Learning structures / Gap and evidence reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 85,000 · indicative USD 95,319

Identified edition: 0.61.0

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.61.0 source, documentation and retained evidence: Engineering research graph with 300 specialist records across 30 domains, source-linked claims and staged research/promotion controls. Zero canon-promoted or verified specialists are established. Source citations and research records do not establish correctness, autonomous expertise or customer performance.

- Zero canon-promoted or verified specialists are established. Source citations and research records do not establish correctness, autonomous expertise or customer performance.
- First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

- Freeze the 0.61.0 first-party delivery and reconcile source-specific acceptance records.
- Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.
- A detailed component inventory and licensing report are required for the agreed delivery scope.
- A security assessment or an explicit statement of its absence is required before acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	85,000	95,319
Negotiation reference - low	68,000	76,255
Negotiation reference - high	106,250	119,149
Recreation cost estimate	467,000	523,694
Marketability cost scenario	502,142	563,102
Monetisation cost scenario	543,763	609,776
Risk-adjusted strategic reference	421,021	472,133
Weighted economic reference	473,288	530,745

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 160 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 17,000 adopted recreation increment and EUR 5,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 588,517; model change EUR 115,229.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Current main has successful repository-integrity CI. Source records 166 research-active and 134 seed specialists; 1,660 Stage-08 claims and 633 unique sources. Counts describe catalogue coverage, not verified engineering expertise.

Remaining limits

Zero canon-promoted or verified specialists are established. Source citations and research records do not establish correctness, autonomous expertise or customer performance.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — Engineering research graph with 300 specialist records across 30 domains, source-linked claims and staged research/promotion controls. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-036 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
