Universal Independent Reasoning Framework

Domain-independent reasoning research software for bounded argument checking, proof artifacts, offline provenance, hypothesis comparison, assumption challenges and declared review decisions.

Product overview

Declared-review decision audits and bounded reasoning/proof/provenance software; implementation scope is unchanged from the existing priced R8 edition.

Potential acquirers

- Research-methodology software teams
- Formal reasoning and verification teams
- Scientific and philosophical research groups

Documented functions

- Check bounded argument graphs and separate proof certificates
- Verify declared local evidence bytes and provenance contracts
- Compare explicitly supplied hypotheses and assumptions
- Generate traceable assumption challenges and review packets
- Audit source-bound declared review decisions and abstention conditions

Available output types

Research-case and assumption reports / Conditional derivation and graph reports / Bounded satisfiability witnesses and contradiction indicators

Defined work. Separate written terms.

Identified edition: 0.8.0 / R8

Research software · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.8.0 / R8 source, documentation and retained evidence: Declared-review decision audits and bounded reasoning/proof/provenance software; implementation scope is unchanged from the existing priced R8 edition. Corrected acceptance does not establish authenticated reviewer independence, universal reasoning correctness, new science or production readiness. Evidence-only update; asking price unchanged.

• Corrected acceptance does not establish authenticated reviewer independence, universal reasoning correctness, new science or production readiness. Evidence-only update; asking price unchanged.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Freeze the 0.8.0 / R8 first-party delivery and reconcile source-specific acceptance records.

• Freeze the specifically agreed first-party edition, documents, rights and exclusions.

• Reproduce representative recipient cases and review component, delivery and acceptance records.

• Keep unsupported scientific conclusions and third-party works outside the transfer scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	15,500	17,382
Negotiation reference - low	13,500	15,139
Negotiation reference - high	20,500	22,989
Recreation cost estimate	53,000	59,434
Marketability cost scenario	20,498	22,986
Monetisation cost scenario	13,515	15,156
Risk-adjusted strategic reference	4,188	4,696
Weighted economic reference	21,518	24,130

Cost basis

The retained priced scope and explicitly non-overlapping implementation budgets reconcile below. Effort and prices remain seller assumptions, not actual expenditure, independent quotations or established market value. Previously budgeted R1/R2 foundations are retained once. Added first-party R3-R8 proof, provenance, comparison, challenge, review-packet and decision-audit code is priced within its bounded implemented scope. External source rights, authenticated reviewers, scientific discoveries, operating services and future work are excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source retains the original faulty-notebook FAIL and a separate corrected requalification: 243/243 integrated tests, 27/27 source identities and corrected question-index verification.

Remaining limits

Corrected acceptance does not establish authenticated reviewer independence, universal reasoning correctness, new science or production readiness. Evidence-only update; asking price unchanged.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: R — Declared-review decision audits and bounded reasoning/proof/provenance software; implementation scope is unchanged from the existing priced R8 edition. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Retained corrected full CPU requalification is documented separately from the original notebook failure; no fresh source execution in this catalogue review.

Rights and component obligations: R1 — Repository licence file identified. Source-specific review and recipient acceptance remain separate.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Source-specific review and recipient acceptance remain separate.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. Source-specific review and recipient acceptance remain separate.

Buyer information and next step

Quote TA-IP-118 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
