Universal Video Intelligence Platform

Control your video viewing, keep and recover your own timecoded research notes, and turn reviewed observations into source-linked project investigations.

Product overview

A local-first video and research-workspace prototype with controlled exports.

Potential acquirers

- Video-tool developers
- Research software vendors
- Knowledge-workflow teams

Documented functions

- Adjust viewing controls
- Keep video bookmarks and notes
- Recover private research drafts
- Prepare source-aware project research
- Export controlled review material
- Search private bookmarks and notes locally (v0.9.9 development candidate)

Available output types

Bookmarks / Research workspaces / Offline review exports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 36,000 · indicative USD 40,370

Identified edition: 0.9.8

Prototype · Conditional handover

Current scope and conditions

Present first-party v0.9.1 browser and offline research prototype, manual notes and backup recovery, source-review and human-supplied evidence review, documentation, tests and development packaging. Browser production qualification, AI transcript/multimodal analysis, media downloading, platform or target-project ownership, hosted services, automatic repairs and future engineering are excluded.

• Local video and research workflows. External-platform access, content permissions and production acceptance are separately scoped.

Conditions before handover

• Agree the exact first-party source version, included development candidate, documentation and delivery manifest with recipient acceptance checks; v0.9.9 remains unmerged.

• Reconcile platform terms, component versions and expressly included first-party rights; external media and target-project rights are excluded.

• Complete independent keyboard/screen-reader, privacy, security and measured performance/reliability acceptance. R28 closes only five source-pinned user-operated live YouTube scenarios per official browser; broader coverage and crash/disk durability remain separate.

• Reproduce note recovery and the agreed local research/review workflows with authorised inputs; source-pinned supplied reports and reviewer declarations are not third-party execution proof.

• Preserve the present prototype scope: hosted SaaS, automatic repository edits, transcript harvesting and validated multimodal AI are future objectives rather than delivered capabilities.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	36,000	40,370
Negotiation reference - low	28,800	32,296
Negotiation reference - high	45,000	50,463
Recreation cost estimate	120,000	134,568
Marketability cost scenario	91,800	102,945
Monetisation cost scenario	85,050	95,375
Risk-adjusted strategic reference	45,518	51,044
Weighted economic reference	81,301	91,171

Cost basis

Some dated work-package assumptions are disclosed, but they do not reconstruct the complete retained recreation anchor. A complete scope-specific budget is required.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 96,834; model change EUR 15,533.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source report documents frozen v0.9.8 143/143 Node and 14/14 real Chromium Playwright test results on offline simulated YouTube pages; exact source SHA pinned.

Remaining limits

Offline mocked YouTube pages, not real-platform production compatibility; broader accessibility, production security and independent release review remain open.

Development position

v0.9.9: fail-closed local mutations, idempotent note replay and read-back reconciliation

Acquisition evidence profile

Technical scope: P — A local-first video and research-workspace prototype with controlled exports. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-100 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
