Verifiable Execution Control Platform

Review and authorise software operations, and follow the evidence needed for a controlled execution workflow.

Product overview

An execution-control asset for authorised actions and attributable operational transitions.

Potential acquirers

- Industrial control vendors
- Enterprise automation teams
- Edge-system integrators

Documented functions

- Review bounded execution requests
- Control action authorisation
- Record state transitions
- Retain execution histories
- Prepare software acceptance evidence

Available output types

Execution records / Authorisation decisions / Acceptance dossiers

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 450,000 · indicative USD 504,630

Identified edition: Delivery edition to be agreed

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	450,000	504,630
Negotiation reference - low	360,000	403,704
Negotiation reference - high	565,000	633,591
Recreation cost estimate	1,250,000	1,401,750
Marketability cost scenario	2,062,500	2,312,888
Monetisation cost scenario	2,875,000	3,224,025
Risk-adjusted strategic reference	3,322,610	3,725,975
Weighted economic reference	2,462,914	2,761,912

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documented real compiled Rust edge + software Modbus/TCP end-to-end duplicate/idempotence and CI; no physical actuator execution.

Remaining limits

AWS/EKS deployment not executed; real machine safety/commissioning and multi-writer persistence not qualified.

Development position

Bump bufbuild/buf-action from 1.5.0 to 1.7.0; Bump tokio from 1.53.1 to 1.54.1 in /edge; Bump serde_json from 1.0.151 to 1.0.154 in /edge; Bump thiserror from 2.0.20 to 2.0.21 in /edge

Acquisition evidence profile

Technical scope: V — An execution-control asset for authorised actions and attributable operational transitions. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-018 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
