SCIENTIFIC OBSERVATION & DOMAIN RESEARCH

Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Study brain-inspired learning and behaviour through repeatable computational experiments.

Reference alias: Iona | Developed software

PRODUCT OVERVIEW

A computational-neuroscience asset for repeatable learning and behaviour studies.

DOCUMENTED FUNCTIONAL SCOPE

- Run controlled neural-dynamics studies
- Compare interventions
- Review multi-source research evidence
- Assess robustness boundaries
- Retain repeatable evaluation records

POTENTIAL BUYERS

Neuroscience research groups; AI research teams; Scientific software vendors.

Suggested positioning; no existing customer contracts are asserted.

DOCUMENTED OUTPUT TYPES

- Neural study reports
- Intervention comparisons
- Qualification evidence

REFERENCE BASELINE

2.2.0

RECORDED SEPARATE DEVELOPMENT

Later robustness and failure-boundary research is recorded as candidate work. Its final release qualification is separate from the retained evidence.

First-party rights reserved

Acquisition brief

Bio-Inspired Neural Dynamics & Active Inference Simulation Platform / TA-IP-077

SELLER ASKING REFERENCE / AS IS

EUR 925,000

ESTIMATED RECREATION COST

EUR 3,300,000

Published pricing basis: 13 October 2026. Existing seller references retained. Recreation cost is an assumed engineering budget, not an independent appraisal, actual expenditure or guaranteed saving. Final consideration and tax treatment are agreed separately.

OFFERED TRANSACTION

AS IS acquisition of the seller-owned first-party software asset and specifically agreed transferable work products. The final written agreement defines the rights, exact delivery, permitted use and acceptance conditions.

CANDIDATE HANDOVER SCOPE

Present first-party software; associated original documentation; existing tests and evaluation material where retained; specifically agreed transferable first-party rights.

SEPARATE OR EXCLUDED

Third-party rights, private user content and credentials; future development, hosting, hardware, commercial operations and support; internal development methods and non-public know-how unless expressly agreed.

MATERIAL LIMITS AND NEXT QUALIFICATION

The project does not establish biological-brain equivalence or clinical validity. Candidate research and retained validation remain separate.

Complete the declared candidate qualification and independent scientific review.

RECORDED SELLER HANDOVER POSITION

Handover subject to conditions | Record date: 2026-10-12. Documentary exhibition review only; product tests and this classification were not independently re-executed.

ENQUIRY AND SOURCE BASIS

State this product reference, intended use and requested delivery with the seller through the channel that supplied this package. Final rights and acceptance require written terms.

Sources: TA-IP-077-P, TA-IP-077-C, TA-IP-077-A. Product overview reviewed 13 October 2026; current commercial register; retained dated seller assessment. See the non-technical source register and price-basis page in the exhibition.
