INDUSTRIAL RELIABILITY & DIGITAL TWINS

# CAUSORYN

Explore how changes could affect interconnected systems, compare alternative scenarios and review the recorded outcomes.

Reference alias: Vespera | Locally tested development prototype

## PRODUCT OVERVIEW

A connected-system modelling prototype for comparable what-if experiments.

## DOCUMENTED FUNCTIONAL SCOPE

- Compose linked system studies
- Compare declared scenarios
- Review supplied observations
- Run local combined simulations
- Retain attributable histories

## POTENTIAL BUYERS

Digital-twin vendors; Systems research groups; Engineering consultancies.

Suggested positioning; no existing customer contracts are asserted.

## DOCUMENTED OUTPUT TYPES

- Scenario comparisons
- Observation records
- Simulation histories

## REFERENCE BASELINE

v0.6.0

# Acquisition brief

CAUSORYN / TA-IP-097

**SELLER ASKING REFERENCE / AS IS**

**EUR 48,000**

**ESTIMATED RECREATION COST**

**EUR 160,000**

Published pricing basis: 13 October 2026. Existing seller references retained. Recreation cost is an assumed engineering budget, not an independent appraisal, actual expenditure or guaranteed saving. Final consideration and tax treatment are agreed separately.

## OFFERED TRANSACTION

AS IS acquisition of the seller-owned first-party software asset and specifically agreed transferable work products. The final written agreement defines the rights, exact delivery, permitted use and acceptance conditions.

## CANDIDATE HANDOVER SCOPE

Present first-party software; associated original documentation; existing tests and evaluation material where retained; specifically agreed transferable first-party rights.

## SEPARATE OR EXCLUDED

Third-party rights, private user content and credentials; future development, hosting, hardware, commercial operations and support; internal development methods and non-public know-how unless expressly agreed.

## MATERIAL LIMITS AND NEXT QUALIFICATION

The implementation does not establish physical equivalence, live sensing or autonomous optimisation. Distributed coupling remains future work.

Qualify representative connected-system models and observations.

## RECORDED SELLER HANDOVER POSITION

Handover evidence incomplete | Record date: 2026-10-12. Documentary exhibition review only; product tests and this classification were not independently re-executed.

## ENQUIRY AND SOURCE BASIS

State this product reference, intended use and requested delivery with the seller through the channel that supplied this package. Final rights and acceptance require written terms.
