AEROSPACE & MOBILITY ENGINEERING

Electric Flight Systems Simulation & Validation Platform

Explore electric-flight concepts and compare simulated behaviour before physical testing.

Reference alias: Amelia | Developed prototype

PRODUCT OVERVIEW

An electric-flight research foundation for early simulation and control experiments.

DOCUMENTED FUNCTIONAL SCOPE

- Run electric-flight simulations
- Study altitude control
- Compare energy behaviour
- Inject modelled failures
- Record experimental telemetry

POTENTIAL BUYERS

Electric-flight research groups; Simulation developers; Engineering education providers.

Suggested positioning; no existing customer contracts are asserted.

DOCUMENTED OUTPUT TYPES

- Flight-study records
- Fault scenarios
- Engineering reports

REFERENCE BASELINE

Acquisition brief

Electric Flight Systems Simulation & Validation Platform / TA-IP-032

SELLER ASKING REFERENCE / AS IS

EUR 50,000

ESTIMATED RECREATION COST

EUR 450,000

Published pricing basis: 13 October 2026. Existing seller references retained. Recreation cost is an assumed engineering budget, not an independent appraisal, actual expenditure or guaranteed saving. Final consideration and tax treatment are agreed separately.

OFFERED TRANSACTION

AS IS acquisition of the seller-owned first-party software asset and specifically agreed transferable work products. The final written agreement defines the rights, exact delivery, permitted use and acceptance conditions.

CANDIDATE HANDOVER SCOPE

Present first-party software; associated original documentation; existing tests and evaluation material where retained; specifically agreed transferable first-party rights.

SEPARATE OR EXCLUDED

Third-party rights, private user content and credentials; future development, hosting, hardware, commercial operations and support; internal development methods and non-public know-how unless expressly agreed.

MATERIAL LIMITS AND NEXT QUALIFICATION

This is an early simulation and prototyping asset. It is not accepted operational flight software or a high-fidelity certified vehicle model.

Review the bounded model assumptions and qualify representative research experiments.

RECORDED SELLER HANDOVER POSITION

Handover subject to conditions | Record date: 2026-10-12. Documentary exhibition review only; product tests and this classification were not independently re-executed.

ENQUIRY AND SOURCE BASIS

State this product reference, intended use and requested delivery with the seller through the channel that supplied this package. Final rights and acceptance require written terms.

Sources: TA-IP-032-P, TA-IP-032-C, TA-IP-032-A. Product overview reviewed 13 October 2026; current commercial register; retained dated seller assessment. See the non-technical source register and price-basis page in the exhibition.
