AEGIS Vision – Evidence-Governed Visual Intelligence Platform

Examine visual material, compare interpretations and follow the evidence supporting your review.

Product overview

A visual-evidence analysis asset that makes interpretations and disagreements reviewable.

Documented functions

- Review visual observations
- Separate observations from interpretations
- Compare analysis results
- Expose disagreements
- Retain qualification and audit records

Potential buyer fit

Visual-analysis software vendors / Research groups / Evidence-review teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Structured visual claims / Comparison reports / Reviewable evidence packages

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 354,500	**EUR 1,165,000**

Current repository documentation

Current main baseline: 2.9.0.

AEGIS Vision 2.9.0 adds post-release change assessment and requalification governance to its visual-evidence, provider-comparison and release-evidence workflow. The repository defines offline deterministic gates; this catalogue did not execute them. Actual provider/model performance, deployment and independent certification remain separately qualified.

Material limitations: Interpretation and evidence integrity do not establish factual truth. No regulatory or evidentiary certification is represented.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Development reviewed 16 October 2026: 2.9.0 (default-branch snapshot). Retained base EUR 1,150,000 plus separately estimated new work EUR 15,000 gives EUR 1,165,000. The new increment has a disclosed work budget; the older base remains a legacy seller assumption. No independent market-value increase is established.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-012-P: current documentation. TA-IP-012-C: financial-reference review, 16 October 2026. TA-IP-012-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
