Integrated Media Production Engine

Manage your media-production work from source selection to review and delivery.

Product overview

A media-production workflow product for accountable stages and controlled delivery.

Documented functions

- Coordinate scripting and production stages
- Review media acquisition
- Track voice and subtitle work
- Recover interrupted jobs
- Control delivery and approval records

Potential buyer fit

Media software vendors / Production studios / Enterprise content teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Production packages / Stage records / Rights and delivery histories

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 457,000	**EUR 1,275,000**

Current repository documentation

Current main baseline: 0.24.0.

The 0.24.0 foundation adds durable artifact-deletion claims and verified byte/size readmission. Repository records report 324 local passes per Python version with native PostgreSQL tests skipped. Prior 0.23.1 native PostgreSQL PASS remains bound to that earlier source; full native 0.24 concurrency qualification is still required. Third-party media rights and provider adapters need separate acceptance.

Material limitations: Full native 0.24 database and concurrency acceptance remains open. A prior release PASS and substitute SQL checks do not close that gate.

Next qualification step: Complete the exact 0.24 native PostgreSQL and concurrency campaigns, and agree the permitted media/provider and delivery scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Development reviewed 16 October 2026: 0.24.0 (default-branch snapshot). Retained base EUR 1,200,000 plus separately estimated new work EUR 75,000 gives EUR 1,275,000. The new increment has a disclosed work budget; the older base remains a legacy seller assumption. No independent market-value increase is established.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-038-P: current documentation. TA-IP-038-C: financial-reference review, 16 October 2026. TA-IP-038-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
