Evidence Intelligence Operations Platform

Collect authorized source material, track evidence and changes, and prepare traceable intelligence dossiers and delivery bundles.

Product overview

A multi-source intelligence prototype for monitoring changes and keeping review decisions attributable.

Documented functions

- Retain source evidence
- Review temporal changes
- Define watch rules
- Route material alerts
- Manage subject dossiers and review queues

Potential buyer fit

Intelligence software vendors / Research teams / Corporate analysis teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Subject dossiers / Alert queues / Evidence-linked reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 169,000	**EUR 900,000**

Current repository documentation

Current main baseline: 6.3.0.

Separate development: 6.4.0 - unmerged authorized-document connector candidate.

Main is 6.3.0. The separate 6.4.0 candidate adds explicitly authorized, bounded local-document collection and verifiable collection receipts. Its retained report records 54 command gates and 192 tests across six installed environments. Historical 6.0.0 and 6.3.0 failures remain failures; repaired 6.3.1/6.3.2 evidence is retained separately. This publication did not rerun those product gates.

Material limitations: Authorized local-file collection has a bounded platform and policy scope. Historical failed releases are not promoted to PASS, and live external-provider ingestion requires separate qualification.

Next qualification step: Review the exact candidate and delivery manifest; qualify controlled read-only HTTPS/API ingestion and each additional operating-system or provider boundary separately.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Development reviewed 16 October 2026: 6.4.0 (frozen unmerged snapshot). Retained base EUR 800,000 plus separately estimated new work EUR 100,000 gives EUR 900,000. The new increment has a disclosed work budget; the older base remains a legacy seller assumption. No independent market-value increase is established.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-005-P: current documentation. TA-IP-005-C: financial-reference review, 16 October 2026. TA-IP-005-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
