VIORITH Mobile Camera Overlay

Explore camera overlays and review captured observations for your mobile perception workflows.

Product overview

A phone-first spatial product for camera overlays, observation and session review.

Documented functions

- Review live camera observations
- Display orientation-aware overlays
- Track object identity
- Capture permitted sessions
- Replay recorded session evidence

Potential buyer fit

Mobile experience developers / Perception software vendors / Camera-product teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Camera overlays / Session packages / Tracking review records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 185,500	**EUR 875,000**

Current repository documentation

Current main baseline: 0.7.0.

The 0.7.0 source adds semantic-provider and dataset evaluation with strict label, frame-count and scope checks. The README records 30 targeted local checks and JavaScript syntax checks; those do not establish general scene understanding, broad device coverage or independent semantic accuracy.

Material limitations: A targeted supplied-dataset gate does not establish broad semantic accuracy or representative camera/device coverage.

Next qualification step: Qualify the selected semantic provider and representative licensed dataset on the intended camera/browser/device combination.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Development reviewed 16 October 2026: 0.7.0 (default-branch snapshot). Retained base EUR 850,000 plus separately estimated new work EUR 25,000 gives EUR 875,000. The new increment has a disclosed work budget; the older base remains a legacy seller assumption. No independent market-value increase is established.

Commercial and delivery boundary

Amounts are seller model estimates, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-081-P: current documentation. TA-IP-081-C: financial-reference review, 16 October 2026. TA-IP-081-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
