This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions; actual expenditure, independent quotations and market value are not established. The previously priced editorial, timing, release-registry and site-builder foundations are reused once. Only the added bounded operational, cost, continuity, replay and offline rehearsal software is included. Live hosting, licensed content, real API charges, editorial/legal clearance, real offsite backups and an operating media business are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
