Custody Integrity Assurance Platform

Simulate accountable custody handovers, inject defined recovery failures and reproduce the resulting evidence packages.

Product overview

A custody-assurance candidate with deterministic reference processing, multi-organisation pilot simulation, executable recovery scenarios and reproducible evidence packaging.

Potential acquirers

- Supply-chain software vendors
- Custody service providers
- Audit and assurance teams

Documented functions

- Process accountable custody transitions
- Evaluate conformance and witness-quorum rules
- Run multi-organisation synthetic pilot scenarios
- Execute eight defined recovery and failure-injection cases
- Produce deterministic evidence packages and audit digests

Available output types

Custody and conformance records / Synthetic pilot and recovery reports / Reproducible evidence packages

Security, identity & traceability

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 140,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.6.0 / synthetic pilot and executable recovery candidate

• All five offline validation layers pass current-source local replay, including six synthetic pilot scenarios and eight deterministic recovery exercises. These are bounded software simulations.

• Real deployment failover, approved RTO/RPO performance, deployed independent witnesses, cryptographic operations and live-pilot acceptance remain open. Synthetic recovery results do not close those gates.

• Governance, independent review, security, legal/privacy, operational and recipient approvals remain required. The retained recreation anchor lacks a complete work-package budget and receives no uplift for this increment.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-009 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-01. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	140,000	156,408
Negotiation reference - low	110,000	122,892
Negotiation reference - high	175,000	195,510
Recreation cost estimate	750,000	837,900
Marketability cost scenario	769,781	859,999
Monetisation cost scenario	835,313	933,212
Risk-adjusted strategic reference	645,424	721,068
Weighted economic reference	734,417	820,491

Milestone-conditioned reference

EUR 911,176; model change EUR 176,759. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Current candidate 0.6.0 adds synthetic pilot and recovery software; the retained anchor and asking reference are unchanged. No price premium is assigned to modeled RTO/RPO or unapproved deployment capabilities.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
