Foundational Existence Research Framework

Examine explicit foundational assumptions and reproduce finite logical countermodels without treating conceptual consistency as evidence about physical reality.

Product overview

An independent foundational-research archive with four analytical volumes and bounded modal-model checks for explanatory necessity, individual identity and grounding assumptions.

Potential acquirers

- Logic and philosophical research groups
- Formal-methods and research-software teams
- Scientific methodology and education publishers

Documented functions

- Review four structured foundational research volumes
- Construct finite modal models with explicit domain and identity rules
- Compare worldwise existence and persistent-individual claims
- Enumerate bounded quantifier and grounding counterexamples
- Report semantic assumptions separately from physical claims

Available output types

Foundational research volumes and protocols / Finite-model counterexamples and enumeration reports / Local regression and semantic-boundary records

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 6,500	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: R3 / modal identity, grounding and four research volumes

• Current local replay passes 57 R2/R3 tests. The R3 bounded enumeration covers 728 models, including 152 identity countermodels; the earlier R2 enumeration remains reproducible. These are finite, model-conditional results.

• Crossworld identity uses stipulated labels, accessibility and varying-domain rules. Barcan-formula and grounding comparisons depend on those choices; they are not unrestricted theorems or evidence about physical existence.

• The four volumes are research documents. Independent formal review, external empirical replication and discoveries about cosmic origins remain unestablished. R4 research and other portfolio assets are outside the offered scope.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-119 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-01. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	6,500	7,262
Negotiation reference - low	5,500	6,145
Negotiation reference - high	8,500	9,496
Recreation cost estimate	22,000	24,578
Marketability cost scenario	8,509	9,506
Monetisation cost scenario	5,610	6,267
Risk-adjusted strategic reference	1,739	1,943
Weighted economic reference	8,932	9,979

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The lowest explicitly scoped seller effort scenario is adopted. This is not actual expenditure, an independent quote or established market value. Only the agreed first-party R2/R3 finite semantic models, 57 regression tests and four research volumes are included. General facts and ideas, third-party works, R4 research, empirical discoveries, independent certification and other portfolio assets are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
