Universal Independent Reasoning Framework

Register assumptions, inspect supplied argument graphs and test bounded premise consistency while keeping factual truth and empirical evidence separate.

Product overview

A deterministic research-case register and bounded classical propositional argument checker for explicit assumptions, supported derivations and premise consistency.

Potential acquirers

- Research-methodology software teams
- Formal reasoning and verification teams
- Scientific and philosophical research groups

Documented functions

- Register structured research cases and assumption relationships
- Validate bounded formula and argument-graph inputs
- Check supported inference rules in dependency order
- Reject cycles and propagate blocked derivations
- Report explicit negation pairs and bounded premise satisfiability

Available output types

Research-case and assumption reports / Conditional derivation and graph reports / Bounded satisfiability witnesses and contradiction indicators

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 6,500	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.2.0 / R2 bounded formal argument graph

• Current-source local replay passes 43 tests. Accepted derivations are valid only relative to the supplied premises and supported rules; input checks do not verify the factual truth of premises.

• Truth tables cover at most eight premise atoms. The argument language excludes first-order, modal and temporal logic; this is not a complete theorem prover or an autonomous scientific-discovery system.

• Independent empirical replication, external source verification, intended-use qualification and recipient acceptance are not established. This asset is independent of other portfolio research frameworks.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-118 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-01. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	6,500	7,262
Negotiation reference - low	5,500	6,145
Negotiation reference - high	8,500	9,496
Recreation cost estimate	22,000	24,578
Marketability cost scenario	8,509	9,506
Monetisation cost scenario	5,610	6,267
Risk-adjusted strategic reference	1,739	1,943
Weighted economic reference	8,932	9,979

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The estimate adopts the lowest explicitly scoped seller effort scenario; it is not logged expenditure, an independent quote, an absolute minimum or established market value. Only the expressly agreed first-party implemented software, tests and research documents in the stated edition are included. Other portfolio assets, universal scientific conclusions, third-party works, independent certification, future development and operating services are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method
