Generative Media Production Platform

Control a first-party media production workflow with isolated inference workers, account ownership and internal usage credits.

Product overview

A local media-production control plane with tenant-scoped accounts, hashed API keys, queued generation jobs and separately operated inference workers. Internal credits reserve and settle usage; administrative controls support suspension, recovery and review.

Potential acquirers

- Media software vendors
- Creator-platform teams
- Production tool developers

Documented functions

- Scope accounts, API keys and jobs to their tenant owner
- Reserve credits and concurrency atomically when accepting jobs
- Settle completed usage and refund failed or cancelled work
- Operate isolated inference workers through a defined protocol
- Review generated media contracts and administrative recovery

Available output types

Generation job and usage records / Validated media artifacts / Administrative and credit-ledger records

Audio, publishing & media

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 162,000	**Prototype**

Current scope and conditions

Version 0.5.1 passed 38 local developer tests and repository identity/boundary checks. Real model/GPU qualification and production acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.5.1

- Model weights and inference runtime are separately installed third-party components under their own terms.
- Internal credits are entitlement units, not currency or a payment service.
- Offline control-plane checks do not establish GPU performance, production security or customer deployment.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-068 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-19. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	162,000	182,299
Negotiation reference - low	126,500	142,350
Negotiation reference - high	202,000	227,311
Recreation cost estimate	910,000	1,024,023
Marketability cost scenario	1,160,250	1,305,629
Monetisation cost scenario	1,433,250	1,612,836
Risk-adjusted strategic reference	1,553,285	1,747,912
Weighted economic reference	1,289,850	1,451,468

Milestone-conditioned reference

EUR 1,652,337; model change EUR 362,487. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate contains EUR 900,000 of previously scoped work plus EUR 10,000 for 0.5.1 commercial control implementation, giving EUR 910,000. This increment assumes 96 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. Asking/negotiation inputs preserve prior asking/cost relationships, rounded half-up to EUR 500. All effort and prices remain seller assumptions; market value and actual expenditure are not established. Existing v0.4 media orchestration and isolated-worker foundations are reused and excluded from this increment. Naming changes carry no premium. Model weights, external inference rights, real payments, GPU performance and production acceptance are excluded.

Partial work budget; retained base requires reconstruction. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
