Aletheia Intelligence Fabric

Collect authorised information, review attributable entity relationships and recover bounded local workflows while evaluating controlled multi-worker reference designs.

Product overview

An authorised evidence and entity-intelligence prototype with recoverable local work state, relationship review and controlled worker-ownership reference workflows.

Potential acquirers

- Evidence and investigation-software vendors
- Enterprise intelligence and compliance teams
- Authorised research and information-analysis providers

Documented functions

- Collect and normalise authorised source information
- Resolve supported entities and inspect bounded relationship graphs
- Review attributable evidence and change records
- Recover bounded local work state after interruption
- Evaluate controlled ownership, retry and stale-worker scenarios

Available output types

Entity and relationship views / Attributable evidence packages / Recovery and continuity records / Reference deployment and acceptance assessments

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 206,000	**Prototype**

Current scope and conditions

A developed prototype with bounded local software qualification. Real distributed deployment and recipient acceptance require separate evidence.

Available for acquisition discussion

Identified edition: 1.4.0

• The offered edition is a developed prototype for authorised information workflows; source permissions and intended-use acceptance remain separate.

• Local durability is a bounded single-writer implementation. Distributed operation requires separately supplied durable persistence and queue services with independent qualification.

• Reference concurrency and recovery checks do not establish production multi-node durability, legal compliance or unrestricted access to third-party sources.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-049 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	206,000	231,050
Negotiation reference - low	164,500	184,503
Negotiation reference - high	257,000	288,251
Recreation cost estimate	977,500	1,096,364
Marketability cost scenario	1,308,628	1,467,757
Monetisation cost scenario	1,686,187	1,891,227
Risk-adjusted strategic reference	1,751,926	1,964,960
Weighted economic reference	1,456,512	1,633,624

Milestone-conditioned reference

EUR 1,870,000; model change EUR 413,488. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions; actual expenditure, independent quotations and market value are not established. The previously priced acquisition, graph, entity, evidence and defensive-control foundations are reused once. Third-party source entitlements, real shared persistence/queue deployment, production multi-node acceptance and legal/operational certification are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
