Evidence-Governed Intelligence Platform

An in-memory evidence-governed reference implementation combining provenance, policy and authority checks with current risk controls and a separately authorized experiment lifecycle.

Product overview

An in-memory evidence-governed reference implementation combining provenance, policy and authority checks with current risk controls and a separately authorized experiment lifecycle.

Potential acquirers

- Evidence-workflow software vendors
- Enterprise governance and compliance teams
- Controlled research-workflow developers

Documented functions

- Retain typed evidence and provenance records
- Recheck policy and scoped authority at governed actions
- Track explicit risks, controls, monitoring and stop state
- Register assumptions, alternatives and experiment criteria before execution
- Require independent declared human review before candidate promotion

Available output types

Evidence and policy-decision records / Authority and approval assessments / Auditable governance workflow packages

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 21,000	**Prototype**

Current scope and conditions

An early implemented prototype for bounded evaluation. Durable operation, wider engines and recipient acceptance remain separate.

Available for acquisition discussion

Identified edition: R6 / package 0.4.0.dev1 / governed risk and experimentation

• Current local replay passes its executed tests. The repository qualification also checks protected earlier contracts, requirement coverage and the bounded R4-R6 example flows.

• Actor identities, reviewer independence, evidence truth and actual external rollback remain trusted-host responsibilities. A promotion record does not execute deployment or establish a causal scientific finding.

• The implementation is in memory. Durable persistence, concurrency guarantees, authentication infrastructure, real-world monitoring, later digital-twin modules and production acceptance remain open.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-095 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	21,000	23,554
Negotiation reference - low	17,000	19,067
Negotiation reference - high	25,500	28,601
Recreation cost estimate	70,000	78,512
Marketability cost scenario	58,905	66,068
Monetisation cost scenario	54,337	60,944
Risk-adjusted strategic reference	29,207	32,759
Weighted economic reference	50,371	56,496

Milestone-conditioned reference

Not established. No accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained priced scope and explicitly non-overlapping implementation budgets reconcile below. Effort and prices remain seller assumptions, not actual expenditure, independent quotations or established market value. Previously priced R3 evidence and R4 governance foundations are retained once. Only additional first-party R5 risk and R6 experiment lifecycle, gate integration, regression and documentation work is incrementally priced. Other assets, the historical source corpus, persistent services, real experiments and future modules are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references
