Evidence-Grounded Multi-Expert Reasoning System

Compare declared reasoning strategies, preserve contradictory or inconclusive results and audit matched controlled-study and replication packages.

Product overview

Evidence-grounded multi-expert reasoning software with matched baselines, controlled-study protocols and cross-model replication evidence packages.

Potential acquirers

- Reasoning and evaluation software vendors
- Enterprise AI assurance teams
- Research organisations conducting controlled model studies

Documented functions

- Route tasks through declared specialist strategies
- Govern capability and strong-baseline comparisons
- Prepare controlled-study evidence packages
- Bind cross-model runs to matched protocols
- Verify nested evidence, lineage and report integrity

Available output types

Controlled-study and replication packages / Baseline comparison and consistency reports / Verifiable audit and provenance records

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 519,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

Identified edition: 2.1.0 / engineering release

• The v2.1 engineering release qualifies the study machinery; real model-backed H1-H7 scientific exit and independent scientific assessment remain separate.

• Fixture outcomes do not establish model superiority, human-level performance or cross-domain robustness. Later roadmap promotion remains conditional on accepted scientific evidence.

• External models, provider services, datasets, deployment and attributable commercial outcomes require separate rights, scope and acceptance.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-053 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	519,000	582,110
Negotiation reference - low	415,500	466,025
Negotiation reference - high	649,000	727,918
Recreation cost estimate	1,869,000	2,096,270
Marketability cost scenario	2,364,285	2,651,782
Monetisation cost scenario	2,901,623	3,254,460
Risk-adjusted strategic reference	2,385,413	2,675,479
Weighted economic reference	2,355,326	2,641,734

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced routing, grounding, evaluation, canonical fingerprints and custody foundations are reused once. Added governed capability/baseline, controlled-study and cross-model replication software is included. Real model-provider runs, H1-H7 scientific success, model or human superiority, empirical data ownership and later development phases are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
