Foundational Existence Research Framework

A foundational research archive with nine analytical volumes, finite semantic/countermodel engines and a bounded bridge from declared observational provenance to software-evidence review.

Product overview

A foundational research archive with nine analytical volumes, finite semantic/countermodel engines and a bounded bridge from declared observational provenance to software-evidence review.

Potential acquirers

- Logic and philosophical research groups
- Formal-methods and research-software teams
- Scientific methodology and education publishers

Documented functions

- Compare finite identity and counterpart semantics
- Analyze premise dependencies, inconsistency and countermodels
- Separate logical, temporal, causal and grounding relations
- Screen declared observational provenance and quarantine acquired records
- Verify complete test/report/source bindings in evidence archives

Available output types

Foundational research volumes and protocols / Finite-model counterexamples and enumeration reports / Local regression and semantic-boundary records

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 18,000	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: R8C / finite semantics and evidence-integrity contracts

• Current local replay passes its executed R2-R8C tests. Earlier R8B acceptance retains its documented omitted-manifest-entry warning; the new contract is tested separately rather than rewriting that evidence.

• NASA acquisition tests use controlled transport and the observational bridge uses declared inputs. No live NASA dataset was retrieved or scientifically admitted in this review.

• The nine volumes and bounded models do not prove facts about ultimate physical existence. Scientific novelty, external peer review, real observational independence and unrestricted causal claims remain unestablished.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-119 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	18,000	20,189
Negotiation reference - low	15,500	17,385
Negotiation reference - high	24,000	26,918
Recreation cost estimate	61,500	68,978
Marketability cost scenario	23,785	26,677
Monetisation cost scenario	15,683	17,590
Risk-adjusted strategic reference	4,860	5,451
Weighted economic reference	24,970	28,006

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained priced scope and explicitly non-overlapping implementation budgets reconcile below. Effort and prices remain seller assumptions, not actual expenditure, independent quotations or established market value. Previously budgeted R2/R3 finite models and four volumes are retained once. Added R4-R8C counterpart, premise, typed-comparison, provenance/quarantine and evidence-contract software plus five further volumes is priced only as first-party research work. Facts, general ideas, third-party works, empirical discoveries and future qualification are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references
