QUBO Structural Analysis and Optimization Platform

QUBO structural-analysis research software with a separately specified weighted Max-3-SAT encoding, explicit auxiliary-variable accounting and bounded exhaustive objective checks.

Product overview

QUBO structural-analysis research software with a separately specified weighted Max-3-SAT encoding, explicit auxiliary-variable accounting and bounded exhaustive objective checks.

Potential acquirers

- Optimisation research teams
- Planning software vendors
- Scientific software developers

Documented functions

- Inspect declared matrix and sparse-structure properties
- Encode normalized weighted clauses under a strict penalty condition
- Preserve constant offsets and source-formula provenance
- Compare every bounded source and auxiliary assignment
- Search declared random-formula families for counterexamples

Available output types

Problem diagnostics / Solution comparisons / Scaling reports

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 90,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.3.0 / bounded weighted Max-3-SAT encoding qualification

• The current local suite passes its executed tests. The separate deterministic encoding campaign checks bounded formulas under the stated variable, clause and penalty assumptions.

• The qualified objective relation belongs to the named encoding. The earlier pairwise structural projection remains a separate research construction and is not an exact satisfiability reduction.

• Finite validation does not establish polynomial-time solution of NP-complete problems, universal spectral barriers or quantum advantage. The retained recreation anchor lacks a complete work breakdown.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-075 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	90,000	100,944
Negotiation reference - low	70,000	78,512
Negotiation reference - high	115,000	128,984
Recreation cost estimate	650,000	729,040
Marketability cost scenario	422,663	474,059
Monetisation cost scenario	372,938	418,287
Risk-adjusted strategic reference	209,570	235,054
Weighted economic reference	394,970	442,998

Milestone-conditioned reference

EUR 465,240; model change EUR 70,270. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Review on 2026-11-03: The specifically agreed first-party structural-analysis and bounded encoding software may be reviewed for transfer. The prior low-confidence recreation anchor is retained without an uplift. Universal complexity claims, hardware, quantum advantage and future research are excluded.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
