# Temporal Causality Breakthrough Research Platform

Preregistered binary-study and research-custody software accompanied by conditional theoretical studies of local scalar-field, horizon and constraint assumptions.

## Product overview

Preregistered binary-study and research-custody software accompanied by conditional theoretical studies of local scalar-field, horizon and constraint assumptions.

## Potential acquirers

- Research-methods and scientific-software developers
- Foundational-physics research organisations
- Evidence-integrity and experimental-protocol teams

## Documented functions

- Prepare fixed binary-study commitments and statistical audits
- Maintain study-bound custody and artifact-integrity records
- Verify streamed local evidence files and their order
- Publish complete local evidence records without replacing targets
- Review explicit theoretical assumptions, controls and unresolved physical gates

## Available output types

Preregistered study and conditional statistical reports / Custody-chain and local-artifact verification records / Research-screening and evidence-publication assessments

Physics, mathematics & optimisation

# Defined work.
# Separate written terms.

| SELLER ASKING REFERENCE / AS IS | CURRENT OFFERED POSITION |
| --- | --- |
| **EUR 14,000** | **Research software** |

## Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.1.0 / custody v3 and CR-OPEN-22 research review

• The executable study/custody source is unchanged and its local regression replay passes. The added CR-OPEN-17 through CR-OPEN-22 material is conditional research documentation.

• Local scalar/constraint calculations do not establish globally consistent backreaction, a stable physical time machine, independently witnessed chronology or a controllable future-to-past message.

• The prior software cost anchor is retained. Theoretical hypotheses and additional documents receive no physical-breakthrough or market-value premium.

## Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

## Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

## Buyer information and next step

Quote TA-IP-113 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

# Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

| PRICE / MODEL REFERENCE | EUR | USD - indicative |
|---|---|---|
| Seller asking reference | 14,000 | 15,702 |
| Negotiation reference - low | 11,000 | 12,338 |
| Negotiation reference - high | 17,000 | 19,067 |
| Recreation cost estimate | 45,500 | 51,033 |
| Marketability cost scenario | 17,597 | 19,737 |
| Monetisation cost scenario | 11,603 | 13,014 |
| Risk-adjusted strategic reference | 3,596 | 4,033 |
| Weighted economic reference | 18,474 | 20,720 |

## Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

## Cost basis

The retained priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced binary-study, custody-v3 and research-screening foundations are retained once. The increment covers file verification, streaming and atomic publication assurance only. Speculative physical mechanisms, a time-travel result, independent witness services, hardware and future experiments receive no monetary premium. Review on 2026-11-03: The previously priced binary-study, custody, streaming and local publication-assurance software is retained once. Conditional research documents through CR-OPEN-22 are described, with no increment for an unproved physical result. Hardware, independent witness services, global physical validation and future experiments remain excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

## Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.

USD display: EUR 1 = USD 1.1216; ECB 2026-11-02. EUR is authoritative.
