Universal Independent Reasoning Framework

Domain-independent reasoning research software for bounded argument checking, proof artifacts, offline provenance, hypothesis comparison, assumption challenges and declared review decisions.

Product overview

Domain-independent reasoning research software for bounded argument checking, proof artifacts, offline provenance, hypothesis comparison, assumption challenges and declared review decisions.

Potential acquirers

- Research-methodology software teams
- Formal reasoning and verification teams
- Scientific and philosophical research groups

Documented functions

- Check bounded argument graphs and separate proof certificates
- Verify declared local evidence bytes and provenance contracts
- Compare explicitly supplied hypotheses and assumptions
- Generate traceable assumption challenges and review packets
- Audit source-bound declared review decisions and abstention conditions

Available output types

Research-case and assumption reports / Conditional derivation and graph reports / Bounded satisfiability witnesses and contradiction indicators

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 15,500	**Research software**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.8.0 / R8 declared-review decision audit

• Current local full-suite replay passes its executed tests, covering the committed R1-R8 implementation. Earlier R7 acceptance retains its own source scope; the separate R8 release gate remains open.

• The software checks supplied structures, declarations and bounded logic. It does not authenticate reviewer identity or independence, retrieve or verify external literature, or establish empirical truth.

• Question candidates and proof artifacts do not establish scientific novelty, unrestricted theorem proving, universal reasoning capability or independent certification.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-118 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	15,500	17,385
Negotiation reference - low	13,500	15,142
Negotiation reference - high	20,500	22,993
Recreation cost estimate	53,000	59,445
Marketability cost scenario	20,498	22,991
Monetisation cost scenario	13,515	15,158
Risk-adjusted strategic reference	4,188	4,697
Weighted economic reference	21,518	24,135

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained priced scope and explicitly non-overlapping implementation budgets reconcile below. Effort and prices remain seller assumptions, not actual expenditure, independent quotations or established market value. Previously budgeted R1/R2 foundations are retained once. Added first-party R3-R8 proof, provenance, comparison, challenge, review-packet and decision-audit code is priced within its bounded implemented scope. External source rights, authenticated reviewers, scientific discoveries, operating services and future work are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.
