Adaptive Cognitive Runtime

Explore how adaptive learning and memory affect decisions in controlled research experiments.

Product overview

An adaptive cognition research runtime for accountable learning and memory studies.

Potential acquirers

- AI research teams
- Cognition research groups
- Scientific software vendors

Documented functions

- Study adaptation and memory
- Compare planned outcomes
- Review uncertainty
- Run sequential-task experiments
- Recover retained research sessions

Available output types

Learning-study records / Planning comparisons / Recovery evidence

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 225,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Computational cognition research. Sentience and human-equivalent performance are not established capabilities.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-070 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	225,000	253,193
Negotiation reference - low	180,000	202,554
Negotiation reference - high	280,000	315,084
Recreation cost estimate	850,000	956,505
Marketability cost scenario	1,075,250	1,209,979
Monetisation cost scenario	975,375	1,097,589
Risk-adjusted strategic reference	1,084,859	1,220,792
Weighted economic reference	1,002,326	1,127,917

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Source references
