Air-to-Water Transition Vehicle

Explore a conceptual air-to-water vehicle in simulation and review how its control choices affect the model.

Product overview

A software-only vehicle research environment for studying an air-to-water transition concept.

Potential acquirers

- Vehicle simulation developers
- Aerospace research groups
- Control research teams

Documented functions

- Run transition simulations
- Compare control studies
- Inject modelled faults
- Replay experiment histories
- Retain validation records

Available output types

Simulation histories / Control comparisons / Study reports

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 40,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Scope and transfer review required

- Software-only vehicle research and simulation. Physical vehicles and certified performance are excluded.
- The delivery perimeter and transfer requirements need further review before terms can be finalised.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-017 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	40,000	45,012
Negotiation reference - low	30,000	33,759
Negotiation reference - high	50,000	56,265
Recreation cost estimate	400,000	450,120
Marketability cost scenario	214,200	241,039
Monetisation cost scenario	153,000	172,171
Risk-adjusted strategic reference	60,961	68,599
Weighted economic reference	194,776	219,181

Milestone-conditioned reference

EUR 221,406; model change EUR 26,630. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.
