Causal State Field Engine

Review how system states change over time and follow the recorded context behind each change.

Product overview

A state-record integrity product for attributable change and selective review.

Potential acquirers

- Audit software vendors
- Enterprise systems teams
- Assurance product developers

Documented functions

- Record declared state changes
- Preserve historical continuity
- Replay retained transitions
- Disclose selected records
- Review record-authentication lifecycle

Available output types

Change journals / Audit records / Selective disclosure packages

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 115,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-061 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	115,000	129,410
Negotiation reference - low	90,000	101,277
Negotiation reference - high	145,000	163,169
Recreation cost estimate	625,000	703,313
Marketability cost scenario	590,625	664,630
Monetisation cost scenario	646,875	727,928
Risk-adjusted strategic reference	352,398	396,553
Weighted economic reference	527,089	593,133

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.
