Electric Flight Systems Simulation & Validation Platform

Explore electric-flight concepts and compare simulated behaviour before physical testing.

Product overview

An electric-flight research foundation for early simulation and control experiments.

Potential acquirers

- Electric-flight research groups
- Simulation developers
- Engineering education providers

Documented functions

- Run electric-flight simulations
- Study altitude control
- Compare energy behaviour
- Inject modelled failures
- Record experimental telemetry

Available output types

Flight-study records / Fault scenarios / Engineering reports

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 50,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

• Electric-flight research software. Physical aircraft, flight certification and operational approval are excluded.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-032 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	50,000	56,265
Negotiation reference - low	40,000	45,012
Negotiation reference - high	60,000	67,518
Recreation cost estimate	450,000	506,385
Marketability cost scenario	309,825	348,646
Monetisation cost scenario	258,188	290,539
Risk-adjusted strategic reference	153,622	172,871
Weighted economic reference	279,870	314,938

Milestone-conditioned reference

EUR 330,368; model change EUR 50,498. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.
