Machine Cognition Research Framework

Study adaptation and decision behaviour through repeatable experiments and comparative review.

Product overview

A bounded cognition research framework for repeatable memory and adaptation experiments.

Potential acquirers

- Cognition research groups
- AI research teams
- Scientific software developers

Documented functions

- Run controlled cognitive experiments
- Study memory and uncertainty
- Compare adaptation conditions
- Review component comparisons
- Export research evidence

Available output types

Experiment records / Comparative studies / Research dossiers

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 85,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

• Computational cognition research. General human-equivalent intelligence is not an established capability.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-020 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-16. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	85,000	95,651
Negotiation reference - low	69,000	77,646
Negotiation reference - high	106,500	119,844
Recreation cost estimate	690,000	776,457
Marketability cost scenario	580,635	653,389
Monetisation cost scenario	395,888	445,493
Risk-adjusted strategic reference	287,898	323,972
Weighted economic reference	468,569	527,281

Milestone-conditioned reference

EUR 557,341; model change EUR 88,772. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The previous whole-project cost anchor remains a legacy seller assumption. The new implemented increment has a separate role/work-package reproduction budget; the base is counted once.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.

USD display: EUR 1 = USD 1.1253; ECB 2026-10-16. EUR is authoritative.
