TA-IP-037 / Eve / INDEPENDENT IP ASSET

MOTHERCODE Research Engine

Explore learning and memory in brain-inspired research models and compare their observed behaviour.

Product overview

An experimental neural-dynamics research asset for repeatable computational studies.

Potential acquirers

- Computational neuroscience groups
- AI research teams
- Scientific software vendors

Documented functions

- Run neural-dynamics experiments
- Compare declared study settings
- Retain reproducible benchmark records
- Review experimental outcomes
- Prepare research evidence

Available output types

Experiment records / Benchmark reports / Research documentation

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 45,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

• Computational neural-dynamics research. Biological equivalence and experimental outcomes require separate evidence.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-037 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

https://thearchitect-max.github.io/MyProjects/projects/mothercode-research-engine/

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	45,000	50,639
Negotiation reference - low	35,000	39,386
Negotiation reference - high	55,000	61,892
Recreation cost estimate	400,000	450,120
Marketability cost scenario	336,600	378,776
Monetisation cost scenario	229,500	258,256
Risk-adjusted strategic reference	166,898	187,810
Weighted economic reference	271,634	305,670

Milestone-conditioned reference

EUR 323,096; model change EUR 51,462. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.

USD display: EUR 1 = USD 1.1253; ECB 2026-10-16. EUR is authoritative.
