Radioastronomy Signal Validation Platform

Review telescope signals, compare findings and assess whether candidate observations withstand further scrutiny.

Product overview

A radioastronomy evidence product for reproducible signal screening and comparison.

Potential acquirers

- Radioastronomy research groups
- Scientific data teams
- Signal software vendors

Documented functions

- Review telescope observations
- Screen candidate signals
- Compare analysis results
- Study calibration and recovery
- Retain observation provenance

Available output types

Signal-screening reports / Calibration studies / Evidence histories

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 275,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-072 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	275,000	309,458
Negotiation reference - low	220,000	247,566
Negotiation reference - high	345,000	388,229
Recreation cost estimate	1,300,000	1,462,890
Marketability cost scenario	1,270,750	1,429,975
Monetisation cost scenario	1,491,750	1,678,666
Risk-adjusted strategic reference	1,282,106	1,442,754
Weighted economic reference	1,326,237	1,492,414

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.
