Signal Processing Universal Framework

Analyse your signals, compare processing results and keep your findings traceable.

Product overview

A signal-analysis foundation for repeatable studies across multiple application domains.

Potential acquirers

- Scientific software vendors
- Industrial analysis teams
- Signal research groups

Documented functions

- Organise supplied signal records
- Run repeatable processing studies
- Review signal quality
- Coordinate domain-specific analysis
- Retain traceable results

Available output types

Analysis records / Domain reports / Processing histories

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 150,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-016 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-16. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	150,000	168,795
Negotiation reference - low	119,000	133,911
Negotiation reference - high	187,500	210,994
Recreation cost estimate	500,000	562,650
Marketability cost scenario	603,750	679,400
Monetisation cost scenario	742,500	835,535
Risk-adjusted strategic reference	609,145	685,471
Weighted economic reference	607,451	683,565

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The previous whole-project cost anchor remains a legacy seller assumption. The new implemented increment has a separate role/work-package reproduction budget; the base is counted once.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.

USD display: EUR 1 = USD 1.1253; ECB 2026-10-16. EUR is authoritative.
