Temporal Physics & Causality Research Platform

Explore causal-order questions through controlled computational-physics experiments.

Product overview

A computational physics research asset for falsifiable causal-order studies.

Potential acquirers

- Physics research groups
- Metrology teams
- Scientific software developers

Documented functions

- Define bounded research studies
- Review experimental assumptions
- Analyse declared observation counts
- Compare hypothesis evidence
- Retain reproducible study records

Available output types

Research protocols / Analysis reports / Hypothesis review dossiers

Physics, mathematics & optimisation

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 50,000	**Research software**

Current scope and conditions

Research software for bounded studies; scientific outcomes require their own evidence.

Available for acquisition discussion

- Computational physics research. Scientific interpretations and physical effects require independent qualification.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-058 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-17. Existing EUR amounts retained; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	50,000	56,265
Negotiation reference - low	40,000	45,012
Negotiation reference - high	65,000	73,145
Recreation cost estimate	1,050,000	1,181,565
Marketability cost scenario	406,088	456,971
Monetisation cost scenario	267,750	301,299
Risk-adjusted strategic reference	82,975	93,372
Weighted economic reference	426,309	479,726

Milestone-conditioned reference

EUR 501,929; model change EUR 75,620. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method
