AUDIO & MEDIA CREATION

Universal Video Intelligence Platform

Control your video viewing, keep and recover your own timecoded research notes, and turn reviewed observations into source-linked project investigations.

Reference alias: Ophelia | Developed prototype

PRODUCT OVERVIEW

A local-first video and research-workspace prototype with controlled exports. Main baseline: v0.9.8; the separate v0.9.9 development candidate remains unmerged.

Documented functional scope

- Adjust playback and use timestamp bookmarks.
- Write private timecoded notes and recover per-video drafts.
- Export and restore local research backups.
- Review source-linked project research and investigation proposals.
- Search private bookmarks and notes locally (v0.9.9 candidate).

POTENTIAL BUYERS

Video-tool developers; research software vendors; knowledge-workflow teams.

Suggested positioning; no existing customer contracts are asserted.

CURRENT MAIN AND DEVELOPMENT EVIDENCE

v0.9.8: recorded 143/143 Node tests and 14/14 actual offline Chromium cases PASS on pinned source.

v0.9.9 / R28: recorded 5/5 live YouTube scenarios PASS in official Google Chrome and 5/5 in official Microsoft Edge, plus 12/12 offline contracts. Source-pinned, user-operated/self-reported evidence; no third-party attestation or production release approval.

The full Chrome and Edge reports were not independently inspected or replayed for this catalogue review. Product tests were not rerun for this presentation update.

LONG-TERM DIRECTION

Permission-aware transcription, OCR, multimodal analysis, cross-video knowledge, evidence-grounded AI and a standalone workspace or API remain future objectives.

Acquisition brief

Universal Video Intelligence Platform / TA-IP-101

SELLER ASKING REFERENCE / AS IS

EUR 36,000

ESTIMATED RECREATION COST

EUR 120,000

Published pricing basis: 13 October 2026. Existing seller references retained. Recreation cost is an assumed engineering budget, not an independent appraisal, actual expenditure or guaranteed saving. Final consideration and tax treatment are agreed separately.

OFFERED TRANSACTION

AS IS acquisition of the seller-owned first-party software asset and specifically agreed transferable work products. The final written agreement defines the rights, exact delivery, permitted use and acceptance conditions.

CANDIDATE HANDOVER SCOPE

Present first-party software; associated original documentation; existing tests and evaluation material where retained; specifically agreed transferable first-party rights. The agreed delivery manifest must identify the included version and any candidate work.

SEPARATE OR EXCLUDED

Third-party rights, private user content and credentials; future development, hosting, hardware, commercial operations and support; internal development methods and non-public know-how unless expressly agreed.

MATERIAL LIMITS AND NEXT QUALIFICATION

Open: hands-on keyboard/screen-reader accessibility, audited privacy/security, measured performance/reliability and native crash/disk durability where required. R28 is a five-scenario, self-reported browser milestone; it does not establish complete product qualification.

Complete those independent quality gates and agree the exact source version, rights, delivery manifest and recipient acceptance checks. The separate v0.9.9 candidate remains unmerged.

RECORDED SELLER HANDOVER POSITION

Handover subject to conditions. Classification and grades retained from 12 October 2026; remaining conditions clarified by the 14 October documentary review. No product retest, reclassification or financial reassessment.

ENQUIRY AND SOURCE BASIS

State this reference, intended use and requested delivery with the seller through the channel that supplied this package. Final rights and acceptance require written terms.

Sources: TA-IP-101-P, TA-IP-101-C, TA-IP-101-A. Product/status review: 14 October 2026; retained commercial register; documentary condition review. See the exhibition source register for scope and dates.
