# Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Compare bounded synthetic neural hypotheses and inspect how scenario availability, erasure and recovery affect their distinguishability.

## Product overview

Developed neural-research software for source-locked synthetic comparisons, scenario recovery, dual erasure and finite availability or critical-cut audits.

## Potential acquirers

- Computational-neuroscience research teams
- Research-software and simulation vendors
- Neural-systems methodology and evaluation groups

## Documented functions

- Compose bounded synthetic neural studies
- Trace scenario-basis and observation contracts
- Audit erasure and controlled recovery witnesses
- Compare dual-scenario removal cases
- Inspect finite availability and critical-cut certificates

## Available output types

Source-locked synthetic study records / Erasure, recovery and availability audit reports / Schema-checked comparison and lineage packages

Scientific observation & life sciences

# Defined work.
# Separate written terms.

| SELLER ASKING REFERENCE / AS IS | CURRENT OFFERED POSITION |
| --- | --- |
| **EUR 958,500** | **Developed software** |

## Current scope and conditions

Developed research or product software within the identified edition and material boundaries. Intended-use and recipient acceptance remain separate.

Available for acquisition discussion

Identified edition: 2.9.13 / qualified CPU scope

• Qualified CPU evidence applies to its identified source and environment. A different local environment still has an unresolved exact numerical replay discrepancy affecting the full downstream suite.

• Scenario availability, critical cuts and recovery witnesses are finite retrospective synthetic results, not empirical outage probabilities, calibrated reliability or new observations.

• These software results do not establish unique biological mechanisms, EEG/BCI validity, causal or clinical findings, AGI or production readiness. Intended-use and recipient-environment acceptance remain separate.

## Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

## Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

## Buyer information and next step

Quote TA-IP-077 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

# Prices & sources.

Price basis: 2026-10-30. EUR is the reference currency; market value is not established.

| PRICE / MODEL REFERENCE | EUR | USD - indicative |
|---|---|---|
| Seller asking reference | 958,500 | 1,070,836 |
| Negotiation reference - low | 766,000 | 855,775 |
| Negotiation reference - high | 1,201,000 | 1,341,757 |
| Recreation cost estimate | 3,417,500 | 3,818,031 |
| Marketability cost scenario | 3,340,606 | 3,732,125 |
| Monetisation cost scenario | 3,921,581 | 4,381,190 |
| Risk-adjusted strategic reference | 3,370,458 | 3,765,476 |
| Weighted economic reference | 3,486,473 | 3,895,088 |

## Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

## Cost basis

The retained expressly priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced neural runtime, source adapters, composition, solver and synthetic hypothesis/observation foundations are reused once. Added scenario-basis, erasure/recovery, dual-erasure and availability/cut software is included. Empirical reliability, biological or clinical findings, universal numerical portability, external data ownership, future phases and production qualification are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

## Source references
