Universal Property Intelligence Platform

Structure property and asset evidence, distinguish facts from assumptions, and prepare replacement-cost summaries.

Product overview

A local property-evidence core with hierarchical asset records, structured CSV/JSON ingestion, explicit observation types, replacement-cost ranges and deterministic reconciliation exports.

Potential acquirers

- Property documentation software teams
- Insurance evidence specialists
- Facilities and estate inventory teams

Documented functions

- Organise property, floor, room and asset hierarchies
- Import structured evidence with unit and currency normalization
- Distinguish observations, declarations and inferences
- Review duplicate candidates and deterministic identities
- Export evidence graphs and replacement-cost ranges

Available output types

Property and contents registers / Replacement-cost summaries / Evidence-linked reports and exports

Specialist applications

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 6,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.2.0

• Opaque document registration does not establish trained vision, automatic document understanding, sensor-derived property truth or an insurance appraisal.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-106 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-30. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	6,000	6,703
Negotiation reference - low	4,500	5,027
Negotiation reference - high	7,500	8,379
Recreation cost estimate	18,500	20,668
Marketability cost scenario	14,153	15,812
Monetisation cost scenario	13,736	15,346
Risk-adjusted strategic reference	7,017	7,839
Weighted economic reference	12,659	14,143

Milestone-conditioned reference

Not established. No accepted next-maturity evidence or future sale/income value is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

Recreation estimate: EUR 12,500 retained scope component plus EUR 6,000 for the explicitly scoped implementation work budget, giving EUR 18,500. The scoped budget assumes 56 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. The retained scope component has its own disclosed work-package estimate; overlapping work must not be added twice. The asking reference and negotiation bounds preserve the seller-selected asking/cost relationships, rounded to EUR 500; they are transaction assumptions, not measured market value.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.

Source references

WIPO - Intellectual Property Valuation Basics — The cost method

Knab - Software developer freelance rates in 2026

Upwork - Software developer hiring costs

European Central Bank - Euro reference exchange rate - US dollar

External sources inform the method, contractor-rate context and currency only. Project-specific prices and model factors remain seller assumptions. The marketability, monetisation and strategic references share a cost anchor; their weighted blend is not an independent appraisal.

USD display: EUR 1 = USD 1.1172; ECB 2026-10-30. EUR is authoritative.
