DMT Laser Phenomenology Engine

Organise reported visual experiences and compare study records for structured phenomenology research.

Product overview

A phenomenology research software platform combining governed observations, provenance and scalar adapters with prespecified comparison designs, separated campaign/custody workflows, controlled calibration, transactional intent metadata and pinned held-out scoring reports.

Potential acquirers

- Perception research groups
- Scientific data teams
- Research software vendors

Documented functions

- Organise governed observations and declared study plans
- Apply scalar measurement contracts and unit conversions
- Propagate standard uncertainty through affine transformations
- Verify portable evidence capsules and observer-key histories
- Retain reproducible computational and package checks
- Prespecify comparison and campaign contracts
- Separate custodian release from analyst calibration and scoring
- Retain transactional intent metadata and recover journal state
- Verify pinned no-refit held-out scoring reports

Available output types

Study dossiers / Hypothesis comparisons / Review records

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 217,500	**Developed software**

Current scope and conditions

Package 8.29.0 with B03 and B04.1-B04.4a software gates. Retained B04.4a evidence records 682 tests and 37 native checks passing. These are software-reference checks; complete scientific empirical qualification remains open.

Available for acquisition discussion

Identified edition: 8.29.0

• Synthetic/software qualification does not authenticate empirical origin, independent human custody, optical causality, clinical benefit or a DMT-laser mechanism.

• Held-out scoring is implemented, while condition-labelled contrasts, sensitivity computations and reference-baseline scientific comparison remain separately qualified future gates.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-023 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-19. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	217,500	244,753
Negotiation reference - low	176,000	198,053
Negotiation reference - high	274,500	308,895
Recreation cost estimate	1,191,000	1,340,232
Marketability cost scenario	708,645	797,438
Monetisation cost scenario	821,790	924,760
Risk-adjusted strategic reference	242,687	273,096
Weighted economic reference	688,777	775,081

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate contains EUR 1,167,000 of previously scoped work plus EUR 24,000 for 8.29.0 / B03 and B04.1-B04.4a software gates, giving EUR 1,191,000. This increment assumes 224 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. Asking/negotiation inputs preserve prior asking/cost relationships, rounded half-up to EUR 500. All effort and prices remain seller assumptions; market value and actual expenditure are not established. Existing v8.28 observation, provenance, scalar adapters and scientific model code are reused and excluded from this increment. Real campaigns, independent custody, empirical origin, condition-label contrasts, sensitivity studies and scientific or clinical qualification are excluded.

Partial work budget; retained base requires reconstruction. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
