Adaptive Audio MIDI Transcription Studio

Turn your recordings into editable MIDI tracks, inspect the notes and take individual parts into your music workflow.

Product overview

An audio-transcription prototype for editable, inspectable music tracks.

Potential acquirers

- Music software vendors
- Production studios
- Creator-tool developers

Documented functions

- Import supported recordings
- Separate source parts when configured
- Create approximate note tracks
- Inspect tracks in a piano roll
- Export individual or combined MIDI

Available output types

Editable note tracks / Piano-roll views / Multitrack MIDI files

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 80,000 · indicative USD 89,712

Identified edition: Delivery edition to be agreed

Prototype · Scope closure required

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• An audio-to-MIDI prototype. Transcription quality and compatibility must be assessed against representative buyer-supplied music.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

Conditions before handover

• Repository licence file not identified.

• Validation/qualification evidence not identified.

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	80,000	89,712
Negotiation reference - low	65,000	72,891
Negotiation reference - high	100,000	112,140
Recreation cost estimate	450,000	504,630
Marketability cost scenario	439,875	493,276
Monetisation cost scenario	478,406	536,484
Risk-adjusted strategic reference	368,814	413,588
Weighted economic reference	425,241	476,865

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 526,318; model change EUR 101,077.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README enumerates separation, MIDI transcription, piano-roll UI and bundle paths; dependency inventory names Basic Pitch, Demucs and external FFmpeg. Independent accuracy/runtime source gate not present in inspected docs.

Remaining limits

No independently measured transcription accuracy, robust full-platform reproducibility or cleared model/audio distribution rights; upstream licenses/weights and installed FFmpeg build need diligence.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An audio-transcription prototype for editable, inspectable music tracks. The offered edition and material boundaries govern review.

Evidence and validation: E1 — Tests or structured evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R0 — No repository licence evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-085 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
