ATHANOR Adaptive Topology, Hazard Analysis, Network Optimization & Resilience

Compare recovery options when your network is disrupted, and review the evidence behind each choice.

Product overview

A deterministic network-resilience research platform for comparing disruption and repair portfolios, shared damaged-network baselines, budget constraints and failure-domain assurance.

Potential acquirers

- Infrastructure engineering teams
- Network research groups
- Resilience consultancies

Documented functions

- Compare deterministic disruption and repair portfolios
- Plan bounded repair shortcuts and zero-budget cases
- Review shared network-efficiency baselines
- Apply failure-domain policies and uncertainty checks
- Replay release and provenance evidence

Available output types

Recovery comparisons / Scenario reports / Decision records

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 97,500	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Scope and transfer review required

Identified edition: 3.7.0

• Network simulations and deterministic software checks do not establish universal optimisation, physical resilience or biological/clinical effects.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-002 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-18. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	97,500	109,717
Negotiation reference - low	77,000	86,648
Negotiation reference - high	123,000	138,412
Recreation cost estimate	532,500	599,222
Marketability cost scenario	391,388	440,429
Monetisation cost scenario	271,575	305,603
Risk-adjusted strategic reference	134,037	150,832
Weighted economic reference	312,631	351,804

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

Recreation estimate: EUR 520,000 retained scope component plus EUR 12,500 for the explicitly scoped implementation work budget, giving EUR 532,500. The scoped budget assumes 120 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. The retained scope component has no complete per-role reconstruction budget and remains a low-confidence seller estimate. The asking reference and negotiation bounds preserve the seller-selected asking/cost relationships, rounded to EUR 500; they are transaction assumptions, not measured market value.

Source references
