Visual-Effects-Spatial-Computing-Platform

Create and animate local visual scenes, compare bounded effects and explore a limited 3D authoring workflow.

Product overview

A standalone visual-authoring development platform with 2D editing, animation and a limited experimental 3D workbench.

Potential acquirers

- Visual authoring software teams
- Creative-tool developers
- Interactive media R&D teams

Documented functions

- Create layered 2D scenes
- Edit timelines and keyframes
- Apply bounded visual-effect graphs
- Explore a limited local 3D scene
- Import and export supported bounded model files

Available output types

Editable scenes / Animation project files / Supported model exports

Visual & spatial software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 8,500	**Prototype**

Current scope and conditions

A standalone development-alpha authoring platform with limited experimental 3D. Browser, GPU, device and production acceptance remain separate.

Available for acquisition discussion

Identified edition: 0.4.0 / R3 development alpha

- Development alpha with limited experimental 3D. Browser, GPU and device acceptance remain separate.
- XR, computer vision, production video encoding and integration with other portfolio projects are excluded.

Offered first-party perimeter

- The specifically agreed first-party software or research work product
- Associated first-party product documentation and retained evaluation material
- The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-107 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-21. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	8,500	9,514
Negotiation reference - low	7,000	7,835
Negotiation reference - high	10,500	11,753
Recreation cost estimate	29,000	32,460
Marketability cost scenario	22,185	24,832
Monetisation cost scenario	20,554	23,006
Risk-adjusted strategic reference	11,000	12,312
Weighted economic reference	19,648	21,992

Milestone-conditioned reference

Not established. No accepted next-maturity evidence or future sale/income value is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses the standalone 2D editor and effect graph. Hardware/GPU acceptance, XR, computer vision, production packaging and any integration with other portfolio projects are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
