Advanced Ground Vehicle Engineering

Compare bounded ground-vehicle engineering studies and trace requirements, configuration changes and evidence-review decisions through reproducible reports.

Product overview

An offline ground-vehicle engineering-analysis prototype with physical-model studies, traceable requirements, versioned audit packages and controlled evidence-policy review.

Potential acquirers

- Vehicle engineering and simulation businesses
- Engineering assurance and validation teams
- Mobility research organisations

Documented functions

- Run supported mobility, energy and thermal studies
- Review model-versus-reference datasets and uncertainty
- Trace requirements to identified evidence
- Compare configuration baselines and evidence lifecycle changes
- Prepare audit packages and policy-governed review queues

Available output types

Engineering-analysis reports / Reference-data comparisons / Traceability and change-impact records / Evidence lifecycle and policy-review packages

Aerospace & mobility engineering

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 60,500	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.13.0

• A non-operational engineering-analysis prototype; software calculations and fixture checks do not establish real-vehicle, field or physical-system qualification.

• Policy, approval and waiver records organise review; they do not confer regulatory approval, legal authority or independently certified engineering evidence.

• Hardware control, real sensor operation, safety-critical deployment and intended-use acceptance remain outside the offered software qualification.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-034 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	60,500	67,857
Negotiation reference - low	49,500	55,519
Negotiation reference - high	77,000	86,363
Recreation cost estimate	495,000	555,192
Marketability cost scenario	340,808	382,250
Monetisation cost scenario	284,006	318,541
Risk-adjusted strategic reference	168,984	189,532
Weighted economic reference	307,857	345,292

Milestone-conditioned reference

EUR 363,405; model change EUR 55,548. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions, not actual expenditure, independent quotations or market value. The previously priced engineering, uncertainty, dataset, scenario and thermal-network foundations are reused once. Added traceability, baseline, audit-package, lifecycle and policy software is included. Vehicle hardware, operational control, physical qualification, certification and independently accepted field data are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
