Causal State Field Engine

Deterministic state-transition integrity and compact audit software with selective disclosure, signed audit commitments and a scoped successor-key lifecycle candidate.

Product overview

Deterministic state-transition integrity and compact audit software with selective disclosure, signed audit commitments and a scoped successor-key lifecycle candidate.

Potential acquirers

- Audit software vendors
- Enterprise systems teams
- Assurance product developers

Documented functions

- Record and replay attributable state transitions
- Produce compact inclusion and continuity evidence
- Disclose selected historical state under explicit rules
- Verify signed audit commitments
- Evaluate scoped successor authorization and proof of key possession

Available output types

Change journals / Audit records / Selective disclosure packages

Evidence & investigation software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 115,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for discussion; current development candidate has unresolved regression checks

Identified edition: 0.8.0 retained scope / 0.9.0 key-lifecycle candidate

• Current full local replay reports failed tests. The new lifecycle tests supply incomplete anchor fixtures to the actual lower-layer verifier; the current release is not fully qualified.

• Prior protocol evidence retains its original version scope. The new lifecycle candidate, current dependency inventory and seller threat model require integrated recipient review.

• Integrity relative to supplied keys and inputs does not establish trusted time, legal identity, universal revocation, independently certified security or production acceptance.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-061 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	115,000	128,984
Negotiation reference - low	90,000	100,944
Negotiation reference - high	145,000	162,632
Recreation cost estimate	625,000	701,000
Marketability cost scenario	590,625	662,445
Monetisation cost scenario	646,875	725,535
Risk-adjusted strategic reference	352,398	395,250
Weighted economic reference	527,089	591,183

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Review on 2026-11-03: The earlier specifically priced first-party state-integrity scope remains the cost anchor. The 0.9.0 scoped key-lifecycle implementation is disclosed as a candidate with unresolved integration checks and no added monetary premium. External authority, deployed security and independently accepted handover are excluded.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
