Chess Strategic Intelligence Platform

Use CROWN to review chess positions and move history, rehearse local practice decisions and compare bounded native analysis within its stated research limits.

Product overview

A standalone local-first chess analysis and training prototype with legally synchronised board history, bounded native research analysers and a separate owner-interface pathway.

Potential acquirers

- Chess and training-software vendors
- Educational game and practice-platform developers
- Research teams evaluating chess-search methods

Documented functions

- Maintain legal board and move-history state
- Review positions from either side
- Support local practice and actual-move correction
- Compare bounded native search and history-aware caches
- Review reproducible training and analysis records

Available output types

Position and move-history records / Bounded native analysis reports / Practice and evaluation packages

Specialist applications

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 20,000	**Prototype**

Current scope and conditions

Available as a specifically scoped research or development software asset. Independent application, rights and handover acceptance remain separate.

Available for acquisition discussion

Identified edition: 1.28.0 / native research scope

• The native v1.28 research analyser and its history-safe cache have local software qualification; independent v1.28 acceptance remains pending. The owner interface retains its separately accepted earlier engine pathway.

• World-class strength, verified Elo, guaranteed wins and strength attributable to an optional third-party engine are not established properties of the proprietary native engine.

• Historical game and derived opening-data capsules retain CC BY-SA 4.0 attribution and share-alike terms. Optional external engines retain their own licences and are outside the proprietary first-party price.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-111 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	20,000	22,432
Negotiation reference - low	16,000	17,946
Negotiation reference - high	25,000	28,040
Recreation cost estimate	67,000	75,147
Marketability cost scenario	51,255	57,488
Monetisation cost scenario	45,225	50,724
Risk-adjusted strategic reference	25,414	28,504
Weighted economic reference	44,941	50,406

Milestone-conditioned reference

Not established. No independently accepted next-stage scope or attributable market/income evidence supports a separate future amount.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate adopts the lowest expressly scoped seller effort scenario. It is not recorded expenditure, an absolute minimum, an independent quote or established market value. Only the specifically agreed first-party local chess application, native research analysers and related documentation are priced. Third-party historical games, derived data and external engine ownership rights are not priced as proprietary assets. Independent strength qualification, future search advances, live integrations and production services are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
