Urban Digital Twin Intelligence & Simulation Platform

An offline urban digital-twin research workbench with geospatial import, deterministic mobility fixtures, paired intervention scenarios, local browser exploration and replayable evidence.

Product overview

An offline urban digital-twin research workbench with geospatial import, deterministic mobility fixtures, paired intervention scenarios, local browser exploration and replayable evidence.

Potential acquirers

- Urban simulation developers
- Planning research groups
- Geospatial software vendors

Documented functions

- Import declared geospatial inputs into a local world model
- Explore the local world in a browser interface
- Run deterministic mobility and intervention scenarios
- Compare paired baseline/intervention runs with explicit seeds
- Export and replay scenario evidence and local records

Available output types

Scenario maps / Mobility histories / Study packages

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 200,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: 0.1.0 / paired scenario comparison and canonical identity

• Current local replay passes its executed tests; optional geospatial-backend checks are skipped in this environment. Paired scenario comparison and product identity tests are included.

• Bundled Maastricht geometry is schematic and traffic behaviour is illustrative. A surveyed city reconstruction, calibrated traffic model and validated planning predictions are not supplied.

• The new canonical name retains TA-IP-087 and Mila. Real-world data admission, independent recipient acceptance and production operation remain separate.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-087 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	200,000	224,320
Negotiation reference - low	160,000	179,456
Negotiation reference - high	250,000	280,400
Recreation cost estimate	1,000,000	1,121,600
Marketability cost scenario	1,026,375	1,151,182
Monetisation cost scenario	860,625	965,277
Risk-adjusted strategic reference	860,565	965,210
Weighted economic reference	928,598	1,041,516

Milestone-conditioned reference

EUR 1,147,402; model change EUR 218,804. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Review on 2026-11-03: The specifically agreed local first-party workbench, paired scenario comparison and documentation retain the prior low-confidence recreation anchor without a naming or version premium. Real-city measurement rights, calibrated planning predictions, hosting and future modules are excluded.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
