Software Asset Provenance & Qualification Platform

Repository provenance and qualification software with component/evidence inventories and a candidate release workflow that checks structured build/test evidence, signatures and cross-file bindings.

Product overview

Repository provenance and qualification software with component/evidence inventories and a candidate release workflow that checks structured build/test evidence, signatures and cross-file bindings.

Potential acquirers

- Software assurance vendors
- IP transaction advisers
- Engineering organisations

Documented functions

- Inventory declared source and component evidence
- Apply explicit qualification policy and provenance checks
- Bind structured test evidence to a repository fingerprint
- Verify signatures and connected release-evidence records
- Prepare a bounded asset dossier from allowlisted evidence

Available output types

Asset dossiers / Release records / Qualification reports

Software assurance & infrastructure

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 240,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for discussion; current development candidate has unresolved regression checks

Identified edition: 0.4.0 retained scope / 0.5.0 release-assurance candidate

• Current local replay reports failed legacy-policy tests: expected IP_READY outcomes now evaluate to FAILED. Complete 0.5 release acceptance is unresolved.

• Structured release receipts and signatures verify supplied technical bindings; they do not independently prove authorship, legal ownership or the truth of reviewer declarations.

• Real isolated-build infrastructure, security review, distribution rights and recipient acceptance remain separate. Interoperability envelopes do not establish a SLSA level or standards certification.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-063 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	240,000	269,184
Negotiation reference - low	190,000	213,104
Negotiation reference - high	300,000	336,480
Recreation cost estimate	850,000	953,360
Marketability cost scenario	1,026,375	1,151,182
Monetisation cost scenario	1,319,625	1,480,091
Risk-adjusted strategic reference	1,035,547	1,161,470
Weighted economic reference	1,044,141	1,171,109

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Review on 2026-11-03: The earlier specifically priced provenance/qualification scope is retained. The 0.5 release-assurance implementation is disclosed as development scope with unresolved compatibility tests and no added monetary premium. Legal title, independent certification and production readiness are excluded.

Retained seller estimate; work breakdown required. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
