Advanced General-Purpose AI Systems Platform

A proprietary AI research and training-control platform with a deterministic core, reviewed model inputs, optional training workers and bounded adapter/checkpoint verification.

Product overview

A proprietary AI research and training-control platform with a deterministic core, reviewed model inputs, optional training workers and bounded adapter/checkpoint verification.

Potential acquirers

- AI product companies
- AI research groups
- Enterprise model teams

Documented functions

- Review model and training-asset declarations
- Run deterministic model-worker and evaluation contracts
- Exercise bounded training, distillation and preference workflows
- Verify low-rank adapter export and merge equivalence
- Retain resumable checkpoint and provenance records

Available output types

Study records / Candidate comparisons / Model-governance dossiers

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 310,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

Identified edition: 5.8.0-alpha.1 / current canonical product identity

• The current local CPU suite passes its executed tests with the optional CPU training dependency installed. Built-in model and data fixtures are deliberately small verification assets.

• Earlier source-specific CUDA records retain their original scope. Current adapter CUDA/Drive acceptance, larger-model quality and independent comparative performance remain open.

• The new product name preserves TA-IP-013 and Thalia. No frontier-model capability, autonomous scientific success or deployed service is established.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-013 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	310,000	347,696
Negotiation reference - low	248,000	278,157
Negotiation reference - high	388,000	435,181
Recreation cost estimate	1,040,000	1,166,464
Marketability cost scenario	1,315,600	1,475,577
Monetisation cost scenario	1,544,400	1,732,199
Risk-adjusted strategic reference	1,327,356	1,488,762
Weighted economic reference	1,296,575	1,454,239

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

Some dated work-package assumptions are disclosed, but they do not reconstruct the complete retained recreation anchor. A complete scope-specific budget is required. Review on 2026-11-03: The previously priced first-party training-control and bounded adapter/checkpoint implementation is retained once. The current change is product naming and packaging metadata; it receives no monetary premium. External model weights, data rights, CUDA qualification, frontier performance and operating services remain excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
