Universal Kernel Machine

Evaluate representation-learning experiments, compare matched model outputs and organise resumable research campaigns with evidence checks.

Product overview

Experimental representation-learning software with controlled comparison harnesses, source-bound evidence review and resumable research-campaign execution.

Potential acquirers

- Machine-learning research teams
- Learning-framework and evaluation-tool vendors
- Research-intensive technology companies

Documented functions

- Train supported feature-driven learning models
- Run bounded comparator and robustness evaluations
- Review evidence against predeclared claim requirements
- Plan and shard deterministic research campaigns
- Resume execution and re-audit campaign evidence

Available output types

Experiment records / Matched-comparison reports / Campaign plans and execution ledgers / Evidence and claim-readiness assessments

AI & decision software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 69,000	**Prototype**

Current scope and conditions

A prototype offered for evaluation and continued development; production acceptance is separate.

Available for acquisition discussion

Identified edition: V59 / package 0.4.0

• An experimental feature-driven learning implementation; graph-aware models are comparators rather than hidden components of the core model.

• Local synthetic checks validate software and evidence handling, not scientific superiority, general robustness or completion of the planned benchmark campaign.

• External datasets, optional benchmark components, empirical campaign execution and production qualification require separate rights and acceptance.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-024 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	69,000	77,390
Negotiation reference - low	53,000	59,445
Negotiation reference - high	85,000	95,336
Recreation cost estimate	584,500	655,575
Marketability cost scenario	491,857	551,667
Monetisation cost scenario	335,357	376,136
Risk-adjusted strategic reference	243,879	273,535
Weighted economic reference	396,925	445,191

Milestone-conditioned reference

EUR 472,124; model change EUR 75,199. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and agreed handover evidence.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions, not actual expenditure, independent quotations or market value. The previously priced learning, training and prototype foundations are reused once. The estimate adds only the implemented evidence/comparison and resumable campaign software. Dataset rights, GPU campaign execution, claimed performance gains, scientific novelty and production qualification are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
