Universal-Systems-Intelligence-Engine

Model connected systems, compare scenarios and examine bounded offline forecast studies with traceable evidence.

Product overview

A research engine for modelling connected systems, comparing bounded decisions and examining reproducible offline forecast studies.

Potential acquirers

- Digital-twin vendors
- Systems research groups
- Engineering consultancies

Documented functions

- Model connected-system scenarios
- Compare bounded forecast and decision studies
- Organise governed research inputs
- Review separated evaluation evidence
- Export portable offline study packages

Available output types

Scenario comparisons / Research evaluation summaries / Portable evidence packages

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 64,000	**Prototype**

Current scope and conditions

An offline systems and forecasting research implementation. Independent predictive superiority, scientific validity and production acceptance remain open.

Scope and transfer review required

Identified edition: 0.7.0 / Q2-C6 research development

• Independent predictive superiority and scientific or physical-system validity are not established.

• The implementation is research software; live integration, safe operational fallback and production acceptance require separate qualification.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-096 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	64,000	71,782
Negotiation reference - low	50,500	56,641
Negotiation reference - high	80,000	89,728
Recreation cost estimate	213,000	238,901
Marketability cost scenario	171,092	191,897
Monetisation cost scenario	122,209	137,070
Risk-adjusted strategic reference	84,833	95,149
Weighted economic reference	141,602	158,821

Milestone-conditioned reference

EUR 168,130; model change EUR 26,528. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and an agreed operational and handover acceptance scope.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses all priced modelling, forecasting and comparison foundations. Independent scientific replication, predictive-superiority claims, live integration and production acceptance are excluded.

Stated scope reconciled to explicit budgets. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
