TA-IP-051 / Vivian / INDEPENDENT IP ASSET

Visionair Research Engine

Experimental machine-learning and ECG research software with reproducible training, frozen external-evaluation records, dataset-consumption governance and a preregistered second-dataset inference workflow.

Product overview

Experimental machine-learning and ECG research software with reproducible training, frozen external-evaluation records, dataset-consumption governance and a preregistered second-dataset inference workflow.

Potential acquirers

- AI research groups
- Cardiac-signal research teams
- Scientific software vendors

Documented functions

- Run controlled training and model-evaluation experiments
- Preserve frozen external-generalization reports and integrity records
- Identify when an external dataset has become a consumed development boundary
- Qualify a separately declared dataset before inference
- Bind model identities, thresholds and resumable inference to a frozen protocol

Available output types

Benchmark records / Cardiac study reports / Qualification dossiers

Visual & spatial software

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 260,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

Identified edition: 0.12.0 / frozen external-baseline and SVDB inference protocol

• Current local CPU regressions pass. Retained INCART records describe three frozen model runs; their descriptive performance is not a predeclared performance success threshold.

• Retained SVDB qualification verifies the declared file/header boundary without running model inference. The 0.12 workflow is implemented, but completed second-dataset performance evidence remains pending.

• The work is research software. Clinical validity, medical-device approval, general superiority, independent reproduction of the external data run and third-party data/model rights are not established by this review.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-051 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-03. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	260,000	291,616
Negotiation reference - low	210,000	235,536
Negotiation reference - high	325,000	364,520
Recreation cost estimate	1,200,500	1,346,481
Marketability cost scenario	1,188,495	1,333,016
Monetisation cost scenario	918,383	1,030,058
Risk-adjusted strategic reference	709,119	795,348
Weighted economic reference	969,692	1,087,607

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

Recreation estimate: EUR 1,200,000 retained scope component plus EUR 500 for the explicitly scoped implementation work budget, giving EUR 1,200,500. The scoped budget assumes 8 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. The retained scope component has no complete per-role reconstruction budget and remains a low-confidence seller estimate. The asking reference and negotiation bounds preserve the seller-selected asking/cost relationships, rounded to EUR 500; they are transaction assumptions, not measured market value. Review on 2026-11-03: The specifically agreed first-party research code, protocol and retained engineering records are available for review. The earlier partially budgeted recreation anchor is retained without an uplift. External datasets/models, clinical claims, a completed SVDB inference result and future qualification are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
