Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Study brain-inspired learning and behaviour through repeatable computational experiments.

Product overview

A computational-neuroscience asset for repeatable learning and behaviour studies.

Potential acquirers

- Neuroscience research groups
- AI research teams
- Scientific software vendors

Documented functions

- Run controlled neural-dynamics studies
- Compare interventions
- Review multi-source research evidence
- Assess robustness boundaries
- Retain repeatable evaluation records

Available output types

Neural study reports / Intervention comparisons / Qualification evidence

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 925,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Computational neuroscience and simulation software. Biological equivalence and clinical outcomes are outside its scope.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-077 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
