Biometric Systems Assurance Platform

Compare authentication-system results and review the evidence behind performance and fairness assessments.

Product overview

A biometric assurance asset for simulated authentication studies and reviewable evidence.

Potential acquirers

- Authentication product vendors
- Device research teams
- Security assurance providers

Documented functions

- Compare authentication settings
- Model device conditions
- Study presentation and fault scenarios
- Review error and latency measures
- Prepare evidence reports

Available output types

Assurance reports / Scenario comparisons / Laboratory review records

Security, identity & traceability

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 240,000	**Developed software**

Current scope and conditions

Existing software offered for evaluation against an agreed use and delivery scope.

Available for acquisition discussion

• Software and simulation for biometric assurance studies. Physical-device performance and independent certification are outside the current scope.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-035 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.
